

Dear reader,

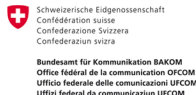

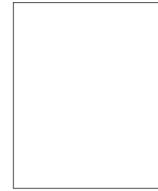

we like to invite you to participate in the European Dialogue on Internet Governance (EuroDIG). EuroDIG is not a usual conference organized top-down by a small committee; it is a platform where participants can set the agenda and shape the issues themselves. Every year EuroDIG takes place in a different European country thereby enabling the local community to broadly participate in the debate on European level.

EuroDIG is build on an open network to discuss and exchange on emerging issues and challenges concerning the Internet, between all stakeholders (governments, international organisations, business and civil society) and other interested communities, covering the 47 member states of the Council of Europe.

EuroDIG is inspired by and inspiring the global UN Internet Governance Forum (IGF) and the other regional and national IGF initiatives. EuroDIG was launched in 2008 and, so far, has held seven annual events (Strasbourg 2008, Geneva 2009, Madrid 2010, Belgrade 2011, Stockholm 2012, Lisbon 2013, Berlin 2014).

The 8th EuroDIG will take place in Sofia / Bulgaria, on 4 - 5 June 2015, hosted by UNICART. We look forward meeting you there!

Sincerely yours  
The EuroDIG team
